

SmokeGate: SG2A

The Future of Cyber Security

The SmokeGate SG2A: Small Office Protection

Are you worried, even as a small business owner, you might be the next cyber breach? Worry no more with the SmokeGate SG2A. It connects your small office to a stealthy SmokeNet VPN service. Your data is not just encrypted, it is hidden in the network. The SG2A connects to a carrier scrambling data across tens of thousands of virtual ports. Two channels - streaming key and data - move around in the network like a virtual shell game played in four dimensions where the channels never align in time or space.

Other VPN services leave your data exposed to Man in the Middle, Injection, Spoofing and other type of network facing attacks. SmokeGate removes network attack vectors. If you want the best in small office cybersecurity, the SmokeGate SG2A combined with with SmokeNet VPN provides the next generation of network data protection.

KEY FEATURES
